WHO WE ARE

We turn slow, manual work into *fast, reliable systems.*

MsCorpres Automation Pvt Ltd is a business-process automation and operations company headquartered in Noida, India. We help Indian growth companies and multinationals entering India set up, digitise and run the functions that keep a business moving — finance, HR, legal, production, inventory, logistics and IT.

Our team brings hands-on experience across automobile, engineering, electronics, telecom, HVAC, IT, travel and R&D — and works as an extension of yours, so you get enterprise-grade execution without a large in-house team.

VISION

To become a global execution partner for businesses.

MISSION

To make our customers successful — by building the robust systems their goals depend on.

2002 Experience in business operations since	**10+ yrs** Our longest-running client partnership
3 Practices: Advise, Build and Run	**1** Accountable partner for every function

WHAT WE STAND FOR

- Innovation
- Efficiency
- Collaboration
- Integrity
- Continuous improvement

WHAT WE DO

Advise. Build. *Run.*

One partner across the full lifecycle — from the first risk assessment to the systems you run on and the teams that operate them every day.

- Production Operations
- Inventory Management
- Logistics & Dispatch
- Facility Management

Expanding into India? Ask for our GCC brochure.

Global Capability Center as a Service — your own dedicated team in India, set up, staffed and run by us, under your brand.

01

ADVISE — STRATEGY & RISK

See risk early. *Act with confidence.*

Risk Advisory

Our risk and advisory services work alongside your ERP and operations, giving leadership early visibility of threats and a clear plan to respond.

- **Enterprise risk assessment** — operational, financial, supply-chain and regulatory risks, scored by likelihood and impact in a prioritised register with owners and deadlines.
- **Internal controls & audit readiness** — control frameworks, approval matrices, process walkthroughs and gap analysis.
- **Compliance & governance** — statutory reviews, policies, SOPs and board-level reporting.
- **Supply-chain & vendor risk** — due diligence, performance scoring, dependency and contingency planning.
- **Business continuity & cyber risk** — BCP/DR planning, access reviews and incident-response readiness.
- **Strategic & process advisory** — process improvement, cost optimisation, transformation roadmaps and KPI dashboards.

Cybersecurity & DPDP

Data-protection and access-control reviews, incident-response preparation and readiness for India's Digital Personal Data Protection (DPDP) Act.

Legal & Corporate Advisory

In-house corporate lawyers for drafting and reviewing technology agreements and contracts, plus business, factory, labour and environmental law registrations.

Business Setup & Expansion

Whether you are a multinational entering the Indian market or a start-up scaling up — entity incorporation, FEMA & RBI filings, tax and labour registrations, and the operating set-up to go live.

02

BUILD — TECHNOLOGY & TRANSFORMATION

Systems that make operations *visible.*

FLAGSHIP · ERP SETUP & IMPLEMENTATION

A fully customisable ERP, built around you

We start by consulting on your existing processes, then plan and implement an ERP that optimises workflows and keeps data reliable — with deep experience in electronics and manufacturing companies.

Subscription model — no large upfront investment

MODULES COVERED

- 01 Order management & invoicing
- 02 Purchase
- 03 Inventory management
- 04 Production & assembly
- 05 Dispatch & logistics
- 06 Finance
- 07 HRMS with Employee Self-Service (ESS) app

MES & Production Systems

Shop-floor tracking, targets and real-time production reporting connected to your ERP.

IT Services & Infrastructure

Networks, devices, cloud and security for offices, plants and GCCs.

Software & Automation

Custom web and mobile applications that replace manual, repetitive work.

Digital Transformation

Roadmaps that move paper and spreadsheet processes onto connected systems.

03

RUN — MANAGED OPERATIONS · BUSINESS FUNCTIONS

Your back office, *handled.*

Finance & Accounts

Information on your desk for faster, better decisions.

- MIS reporting for leadership
- Voucher-to-balance-sheet accounting
- GST, tax and FEMA compliance
- Compliance support for fund raising
- Debtor control and collections
- Audit preparation and support

HR, Payroll & Admin

The right people, paid on time, every time.

- Hiring aligned to your vision and business plan
- On-time HR and payroll processing
- Right-sizing as requirements change
- Fully outsourced HR operations
- Training and development
- Employee self-service via our ESS app

Legal & Statutory Compliance

Stay compliant in India — without the guesswork.

- Drafting and review of technology agreements and contracts
- Business law registration and compliance
- Factory and labour law compliance
- Environmental law registration and compliance
- In-house legal, secretarial and audit teams

03

RUN — MANAGED OPERATIONS · PLANT & SUPPLY CHAIN

From raw material to *your customer's door.*

Production Operations

Target-driven output, every day.

- Set up your own unit or manage third-party job workers
- Daily, weekly and monthly production analysis
- Daily targets with tracked achievement
- Less delay, wastage and labour friction
- Coordination with stores and dispatch
- Operations run at your site

Inventory Management

Working capital out of dead stock.

- Prevent funds getting stuck in dead inventory
- Warehouse layout and organisation
- Timely raw material to production
- Real-time stock status and analysis
- Supply matched to customer orders

Logistics & Dispatch

On time, tracked, penalty-free.

- Selection and review of logistics partners
- E-commerce dispatch and returns
- Automated shipment tracking
- Dispatch and delivery analytics
- Fewer marketplace penalties and bad reviews

Facility Management

Zero breakdown is the goal.

- Repair and maintenance across your unit
- Civil, mechanical and electrical upkeep
- Lower AMC costs with 24-hour availability
- Space planning and energy optimisation

WHY MSCORPRES

Expert in *execution.*

One point of contact

A single accountable partner for every function — no juggling vendors.

Target-based delivery

Work tied to measurable targets, with achievement tracked and reported.

Full visibility

Complete control and real-time information on your desk.

Your own facility

We help you establish your own manufacturing, assembly or warehouse.

Experts on your site

Specialists work inside your operation — no job-work dependency.

Built to scale

Start with one function and expand as you grow — up to a full GCC.

OUR TEAM

Specialists available for you

- Software developers & engineers
- Production & quality experts
- Electrical engineers
- Chartered accountants
- Company secretaries
- Cost accountants
- Corporate lawyers
- Supply-chain experts
- HR professionals
- Service & maintenance experts
- Trained staff & workforce
